

Network World Selects Attune Systems to its “Top 10 Virtualization Companies To Watch” List

Santa Clara, Calif. – August 22, 2007 – Attune Systems, Inc., a provider of enterprise-class file virtualization solutions, today announced that it has been selected to “the top 10 companies to watch” list published by Network World. Attune has been named one of the “top 10 technology innovators,” with “...products that boost performance, make management easier, or otherwise enhance your virtualization experience.”

The Maestro File Manager™ is described as a “file virtualization appliance that discovers, analyzes, manages, and optimizes heterogeneous file storage resources,” and “handles non-disruptive data migration, server retirement, data consolidation, tiering, and global namespace across Windows file servers and network-attached storage.” The Network World editor also spoke with Attune customer, Zak Khalil, MIS manager at Lessard Group, who stated that the Maestro File Manager “runs with any existing storage...it's very easy to implement, and it works.”

The article goes on to mention other Attune customers including: Bluesocket, Central Florida YMCA, Granite Telecommunications, Interwoven, Insulet, and Lessard Group.

“Getting recognition from a well-known high-tech publication such as Network World is flattering and echoes what we are hearing directly from our customers,” said Daniel Liddle, Attune Systems’ vice president of marketing. “Since launching our first product a year ago, we have built significant momentum with customers and partners, as well as increased our awareness among industry analysts and top publications such as Network World.”

About Attune Systems

Attune Systems solutions reduce file management complexity for enterprise, government, and education storage environments while slashing operating costs and increasing scalability. The company’s flagship product, the Maestro File Manager, is a file virtualization appliance that helps IT administrators discover, analyze, manage, and optimize their existing, heterogeneous file storage resources without impacting end users. File virtualization is the low-risk, high-impact first step towards implementing an effective File Area Network (FAN). Attune’s investors include Alloy Ventures, GF Private Equity Group, LLC, QTV Capital, Rock Creek Capital, RWI Ventures, Shea Ventures, and Shoreline Venture Management.
