

## **Attune Systems CEO Selected to Present on File Virtualization at Data Protection Summit**

Santa Clara, Calif. – March 4, 2008 – Attune Systems, Inc., a provider of enterprise-class file virtualization solutions, today announced that Alan Kessler, the company's chief executive officer, has been selected as a speaker at the Data Protection Summit. He will be discussing the benefits of file virtualization as it applies to data protection and data security on March 11, 9:10-9:40 a.m. PDT, at the Hilton Hotel in Irvine, Calif.

The Attune session will cover the latest trends driving file virtualization as a data protection tool. Kessler will discuss the business challenges to effectively manage disaster recovery, data migration and consolidation, while talking about how file virtualization can help organizations optimize, manage, and protect their unstructured data environments. He will also include real-world customer case studies, showing the benefits of file virtualization in a customer environment.

The Data Protection Summit will focus on how to keep data safe and secure, protect information assets, avoid data breaches, and achieve regulatory compliance. The program deals with the handling of data throughout its lifetime, from entry through archiving or destruction. Industry leaders will show how to protect data effectively, considering such factors as cost, business value, restoration time and effort, and use of computing resources. Attendees will be able to ask questions, see the latest products, meet key people, and participate in important discussions. ### **About Attune Systems**

Attune Systems solutions reduce file management complexity for enterprise, government, and education storage environments while slashing operating costs and increasing scalability. The company's flagship product, the Maestro File Manager, is a file virtualization appliance that helps IT administrators discover, analyze, manage, and optimize their existing, heterogeneous file storage resources without impacting end users. File virtualization is the low-risk, high-impact first step towards implementing an effective File Area Network (FAN). Attune's investors include Alloy Ventures, GF Private Equity Group, LLC, Quicksilver Ventures, Rock Creek Capital, RWI Ventures, Shea Ventures, and Shoreline Venture Management.
