

Attune Systems Announces Integration of File Virtualization and Data Domain Deduplication Solution

Maestro File Manager 2.6 Available for Flexible, Cost-Effective Tiered Storage Management

Santa Clara, Calif. – March 24, 2008 – Attune Systems, Inc., a provider of enterprise-class file virtualization solutions, today announced the availability of Maestro File Manager™ 2.6. The new product release allows customers to leverage the integration of Attune's Maestro File Manager and Data Domain's line of deduplication storage systems for a comprehensive tiered storage solution that significantly decreases storage costs.

"We are pleased to announce general availability of our Maestro File Manager 2.6, which offers end users the option to smoothly integrate the latest file virtualization and de-duplication solutions in their environments," said Alan Kessler, chief executive officer of Attune Systems. "They can now automatically place and migrate files among storage tiers, both in-band and out-of-band, with Data Domain systems."

Pricing and Availability

Maestro File Manager 2.6 is available now directly through Attune Systems and its alliance of channel partners at an MSRP of US\$34,995 for a single appliance or in a high-availability configuration for US\$97,995.

About Attune Systems

Attune Systems solutions reduce file management complexity for enterprise, government, and education storage environments while slashing operating costs and increasing scalability. The company's flagship product, the Maestro File Manager, is a file virtualization appliance that helps IT administrators discover, analyze, manage, and optimize their existing, heterogeneous file storage resources without impacting end users. File virtualization is the low-risk, high-impact first step towards implementing an effective File Area Network (FAN). Attune's investors include Alloy Ventures, GF Private Equity Group, LLC, Quicksilver Ventures, Rock Creek Capital, RWI Ventures, Shea Ventures, and Shoreline Venture Management.
